BACK TO SCHOOL IN THE 'NEW NORMAL'

Schools are opening and parents have a role to play in making the return to school healthy, safe, and smooth. On top of the usual items to bring to school, the 'new normal' sees a few new staples to include in your child's school kit. Here is a checklist to help children return to school safely:

FACE COVERINGS

Items like face masks or shields protect the wearer and each other during social settings.

HAND SANITISER

An easy-to-carry bottle of alcohol-based hand sanitiser can help prevent the spread of COVID-19.

DISINFECTING WIPES

Include a pack of disinfecting wipes in your child's school bag. Ask them use it sanitise surfaces, such as their desk or even books.

FOOD AND UTENSILS

Students are encouraged to bring food from home, along with utensils such as fork and spoon. Plus, this way, you also get to keep track of your child's food and nutritional intake.

TALK TO YOUR CHILD

An understanding on why they have to practice personal hygiene and social distancing can go a long way. So be sure to communicate with and explain to your child the situation and importance of staying safe.
